

MEME KILLER!

**METO**

**GROW EARN TRANSACT WITH  
YOUR FAVOURITE MEME KILLER  
METO**

**MEME KILLER!!!!**

# **SHOOT THOSE MEMES**

**WHAT DEFINES HOW USEFUL A MEME COIN IS  
IN COMPARISON TO THE OTHERS? WHAT USE  
CASE DO THEY HAVE? IN THE LONG RUN, DO  
THEY EVEN STAND A CHANCE?**

**THERE IS NO FUNDAMENTAL VALUE DRIVING  
THE PRICES, AS THESE ARE JUST HYPED  
COINS. IN FACT, THE CONCEPT ORIGINATED  
AS A CRITIQUE OF CRYPTOCURRENCY  
MARKET. MOST OF THESE MEME COINS  
CULMINATE IN PUMP N DUMP SCHEMES  
WHERE INNOCENT END UP LOSING HARD-  
EARNED MONEY. UNFORTUNATELY, MANY  
ORGANIZATIONS WITH NOT SO GOOD  
INTENTIONS ARE MANIPULATING THE  
MARKET. WE ARE ON A MISSION TO CREATE  
THIS AWARENESS AMONG OUR PEOPLE.**

# METO REWARDS

BONUS

JACKPOT

REFERRAL

PASSIVE BNB REWARDS

THE WORLD'S 1ST  
REWARDING TOKEN

# TAKE HOME BNB

METO IS A NEW BSC HIGHLY REWARDING  
TOKEN. ALL HOLDERS OF METO ARE

MAKE! BNB IS REWARDED TO HOLDERS WHEN  
BUYS AND SELLS TAKE PLACE!.

## **MOBILE PAYMENTS MADE EASY**

**USE A MOBILE DEVICE TO CONNECT WITH THE CRYPTO WORLD AND PAY WITH SIMPLE STEPS**

## **LOW TRANSACTION FEES**

**YOU CAN TRANSACT METO TOKEN AT A VERY LOW TRANSACTION FEE**

## **PROTECTS YOUR IDENTITY**

**USES STRONG DATA ENCRYPTION ALGORITHMS AND CRYPTOGRAPHY TO PROTECT YOU**

## **SECURITY & CONTROL OVER MONEY**

**TRACK YOUR SPENDS WITH OUR NEATLY GENERATED INSIGHTS**

# METO UNIQUE BUYBACK FUNCTION

The meto - meto buyback function also known as the kraken , is funded by the strategic buyback fee. Once the contract collect 25 million meto from the transaction fees , it converts ( sells meto ) for BNB and locks that BNB back in the meto - METO contract ( while also sending the appropriate allocation to the project susutianbility wallet ) .

The BNB locked and stored in the meto - METO contract is known as the kraken strategic Reverse .

The meto - meto contract is closed so that the meto strategic Reverse can only be utilised to buyback meto from the open market via the liquidity pool hosted on panckswap . These funds cannot be sent to any external wallet . Once the meto tokens are bought back the new BNB amount is added toh the liquidity pool and the meto tokens bought are immediately burned .

This creates a true burn meaning real value is exchanged for the tokens that are sent to the burn wallet .

The krakens strategic reserves are deployed at specific moments to create stability during downward market trends chart manipulation or whale dumps
